If you're looking for a specific title or author, using the search bar is the best way to find materials.

If you're looking for a certain genre or type of book, using the categories is the best way to find materials.

1. Type the author or title into the search bar and press the enter key on the keyboard OR click the category you'd like to search within.
2. Your results will be displayed along with any available filters for narrowing your results.

Your search results, by default, will be sorted by relevancy but you can select a different option from the drop-down menu.

You can begin to narrow your results based on the type of material you're looking for: eBooks for reading on your eReader or tablet or audiobooks for listening to.

By default, your search results will display "All Titles". Select "Available Now" to show only titles that are currently available to checkout.

If your device is only compatible with a certain eBook/audiobook format you can select that format here. OR you can select that specific device under "Device"

Depending on your search/category, different filter options will be available. To use these filter options, click the "+" next to them and then choose how you would like to filter your results.
